WORK ASSIGNMENT ENVIRONMENTAL PROTECTION AGENCY RESEARCH TRIANGLE PARK, NC 27711	EPA CONTRACT NO: EP-D-10-042
	CONTRACTOR: SC&A
	WA NO: 2-03
	WA CHANGE NO: 0
TITLE: Technical/Regulatory Support for Subpart W of NESHAPS	DATE:2/9/2011

DESCRIPTION: The contractor shall provide a work plan, QAPP and cost proposal. The Office of Radiation and Indoor Air (ORIA) promulgated a National Emission Standard for a Hazardous Air Pollutant (NESHAP) for radon emissions from operating uranium mill tailings impoundments (Subpart W) on 12/15/1989. Subpart W includes two separate standards. First, existing sources must ensure emissions from tailings impoundments not exceed 20 pCi/m^2-sec of radon-222. Second, new sources must comply with the requirements for constructing one of two types of impoundment structures. Subpart W requires that existing sources file an annual report of the facility's emissions. Section 112(q) of the Clean Air Act, as amended (CAAA) requires EPA to review, and if appropriate, revise, this standard on a timely basis (10 year interval). The Agency has not reviewed this standard in the period allotted and now desires to do so. The purpose of this work assignment is to obtain contractor support for the development of a rulemaking potentially modifying the requirements of Subpart W. This particular work assignment will focus on the development and production of a Background Information Document.

WAM: Reid J. Rosnick
